SUMMARY

Final-year Software Engineering student with hands-on Development Intern experience at FPT IS, where I built an enterprise-scale procurement platform end to end. Comfortable across the stack with Java/Spring Boot, ASP.NET Core, Angular and React, and experienced integrating AI tools into the engineering workflow while retaining full ownership of code review, automated checks and testing. Seeking Software Developer Intern or Fresher roles.

EXPERIENCE

FPT IS Development Intern	Apr 2026 – Jul 2026
- Independently designed and delivered eProcure Enterprise, an enterprise-scale procurement platform covering the full purchase-to-pay lifecycle — see Selected Projects for architecture detail. - Worked directly with a technical mentor to define system architecture, coding standards and business workflows for a nine-service platform. - Integrated AI tools into research, implementation and documentation, while retaining full responsibility for code review, automated checks and functional testing.	

SELECTED PROJECTS

eProcure Enterprise Solo AI-assisted Engineering Capstone	2026
<i>Java 17, Spring Boot, Angular, PostgreSQL, Kafka, Redis, Keycloak, Docker</i> GitHub Demo - Built a nine-service enterprise procurement platform with role-aware workflows for purchase requests, multi-level approvals, purchase orders, goods receipt, invoice matching and payment. - Applied Clean Architecture, event-driven service boundaries, permission-based authorization, idempotent write operations and audit-oriented data rules.	
YourSneaker Solo Full-stack Product	2026
<i>ASP.NET Core 9, React, TypeScript, MySQL, Docker, VNPay Sandbox</i> GitHub - Built a sneaker e-commerce product covering storefront, product discovery, cart, checkout, order tracking and administrative workflows. - Applied four-layer Clean Architecture and integrated COD and VNPay sandbox payment flows across backend, frontend and database design.	
Student Dormitory Management Project Lead & Developer	Feb 2026 – Apr 2026
<i>Java, Spring Boot, PostgreSQL, Jira, PayOS 6-member team</i> GitHub Led a six-member team through Jira — owned task allocation and feature integration while building room/bed selection, registration, payment and monthly utility workflows.	

TECHNICAL SKILLS

Backend: Java, Spring Boot, ASP.NET Core, REST APIs
Frontend: Angular, React, TypeScript, HTML, CSS/SCSS
Data: PostgreSQL, MySQL, SQL
Architecture & Delivery: Clean Architecture, Microservices, Docker, Git, Jira
Working Knowledge: Kafka, Redis, Keycloak, OpenAPI

EDUCATION & CERTIFICATION

Ho Chi Minh City University of Technology (HUTECH)	Oct 2022 – Expected Oct 2026
<i>B.E. in Software Engineering GPA: 3.53 / 4.00 Outstanding Student Award, 2023–2026</i>	
Aptis ESOL B2 British Council
