Overview

Final-year Software Engineering student at HUTECH with internship experience at FPT IS, developing enterprise applications using Java Spring Boot, Angular, PostgreSQL, Docker, and Keycloak. Experienced in REST API development, authentication and authorization, Git workflow, and applying Clean Architecture principles. Passionate about building scalable backend systems and continuously improving software quality.

Education

10/2022 - Present

Software Engineering student, Ho Chi Minh City University of Technology (HUTECH)

GPA: 3.53/4.0

Expected time to graduate: 10/2026

Skills

Languages

Java, JavaScript, SQL, HTML, CSS

Backend

Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST API

Frontend

Angular, TypeScript, Bootstrap

Database

PostgreSQL, SQL Server, MongoDB

DevOps & Tools

Docker, Docker Compose, Git, GitHub, Jira, Postman

Soft Skills

Problem solving, analytical thinking, teamwork, self-learning, communication, adaptability

Experience

Development Intern – FPT IS Company Limited

Apr 2026 – Jul 2026 | Project: eProcure Enterprise

- Completed a 3-month structured backend training program, progressing through mentored assignments on authentication, reporting and workflow automation before delivering a full-stack capstone project.
- Built REST APIs with Spring Boot, Spring Data JPA and PostgreSQL; added Keycloak-based authentication/authorization, JasperReports, and a Camunda BPM approval workflow with Spring Security
- Delivered E-Procurement, a Spring Boot + Angular system for enterprise purchase requests, approvals and vendor management.

Projects

Student Dormitory Management (Group Project)

Feb 2026 – Apr 2026 | 6 members | Project Lead / Backend Developer

- Leading a 6-person team via Jira; designed the system architecture and built the core REST APIs in Spring Boot.
- Modeled and optimized the SQL schema; set coding standards and the Git branching workflow .

Tech: Java, Spring Boot, PostgreSQL, Jira

Quiz Web (Group Project)

Dec 2025 – Jan 2026 | 2 members | Fullstack Developer

- Built RESTful APIs with Node.js/Express and a MongoDB schema with randomized question-generation logic.

Tech: Node.js, ExpressJS, MongoDB
